-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This is the first Office Action for the serial number 10/786,666, PORTABLE SUPPORT DEVICE STRUCTURE, filed on 2/25/04.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

The drawings are objected to because figures 2 and 9 show exploded views and they require bracket, see MPEP 608.01 under "Exploded View". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

Art Unit: 3632

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The abstract of the disclosure is objected to because "One embodiment of the invention comprises" is indefinite because this is referring to a specific figure in the drawing which is not permitted in the abstract. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "said portable device" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim 11 recites the limitation "said camera cellular phone" in lines 8-10. There is insufficient antecedent basis for this limitation in the claim.

Claim 18 recites the limitation "said camera cellular phone" in lines 10-12. There is insufficient antecedent basis for this limitation in the claim.

Claims 2-10 are rejected as depending on rejected claim 1. Claims 12-17 are rejected as depending on rejected claim 11.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2, 4, 9 are rejected under 35 U.S.C. 102(b) as being anticipated by
US Patent # 4,579,322 to Schwarz.

Schwarz teaches a portable device support structure comprising a support section (4) having a plurality of support legs (10), a clamping section (1-3) connected to the support section. The clamping section comprises a first (2) and second (3) sections. The first section is movable. The structure comprises an adjusting member (5), which adjusts the position of the first section with respect to the second section. The clamping section clamps the portable device (18) when the portable device is placed between the first and second sections. The adjusting member is actuated to apply force on the portable device between the first and second sections. The support section comprises three support legs. The adjusting member is a screw that runs through the first section and is connected to a threaded member in the second section. The support legs include telescoping members.

Allowable Subject Matter

Claims 3, 5-8 and 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 11-18 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

In regard to claim 3, the prior art fails to teach the portable device is a camera cellular phone. In regards to claim 5, the prior art fails to teach wherein the first section includes a pivotably mounted extension piece. In regards to claim 6, the prior art fails to teach wherein the second section includes a pivotable mounted extension piece. In regard to claims 7-8, the prior art fails to teach wherein the first second and the second section include a pivotably mounted extension piece. In regards to claim 10, the prior art fails to teach the clamping section is pivotably mounted to the support section. In regard to claims 11-18, the prior art fails to teach wherein the clamping section clamps the camera cellular phone when the camera cellular phone is placed between the first section and the second section and when the adjusting member is actuated to apply force on the camera cellular phone between the first section and second section.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
